Product Description

Work Smarter and Faster at Height

On a sit down reach truck, operators work with technique and fidelity at any height without compromising productive forces. Sit down reach truck feature various alliances of advanced hydraulics and motors, programmable features, instinctive displays, one-touch controls and camera options that all work together to optimize performance

Making Safety Personal

The reach truck makes safety even more personal with connotations, automated assistance and dynamic coaching that provides contextual guidance to help increase operator consciousness. Consider it like an onboard virtual coach.

Clear interactive displays, automatic assistance and coaching, contextual alarms, pre-programmed safety reminders and unimpeded views further raise performance and productive forces.

Excel in Ultra Environments

Design features throughout the reach truck help maintain durable performance in severe, erosive surroundings.

Chassis seams and studs are coated with a wax-based corrosion preventative compound.

Silicon sealer is applied to all revelational electrical connections.

An additional layer of paint is applied to the motor compartment.

Clear vernis is applied to all steel components in the motor compartment for extra protection.

Make it Personal

Ergonomics and individuation play a life-or-death role in jacking productive forces. Operators of a reach truck can choose the first-rank position for control, visibility and workflow.

Adjustability all Around

All models include adaptability for suspension seat height/weight and forward/reverse seat position. Seat tilt and lumbar support are also adjustable, as are steering tiller height and acclinic position.

Visibility

The reach trucks' mast gives the operator a better view of the load wheel, fork and pallet. The optional panoramic glass of the reach truck enhances visibility and provides a lofty chip fendering.
